# Table of Contents

## Foreword

## Workshop organization

## Table of Contents

*Papers are listed alphabetically by the first author’s last name*

## Talks/Papers

Miguel Ángel Álvarez De La Concepción, Luis González Abril, Juan Antonio Ortega Ramírez and Luis Miguel Soria Morillo

*A qualitative methodology to reduce features in classification problems* .......................................................... 1

Alfredo Burrieza, Emilio Muñoz-Velasco and Manuel Ojeda-Aciego

*PDL for Qualitative Reasoning about moving objects. A first step* ................................................................. 6

Maria Chang, Jon Wetzel and Ken Forbus

*Qualitative and Quantitative Reasoning over Physics Textbook Diagrams* ......................................................... 11

Zoe Falomir, Lledó Museros, Juan Antonio Ortega and Francisco Velasco

*A Model for Qualitative Colour Description and Comparison* ............................................................................. 17

Scott Friedman, Ken Forbus and Bruce Sherin

*How do the seasons change? Creating & revising explanations via model formulation & metareasoning* ............................................................................................................. 26

Joanna Golinska-Pilarek and Emilio Muñoz-Velasco

*Reasoning with qualitative velocity* .................................................................................................................... 34

Fernando Goulart, Paulo Salles and Ricardo Bomfim Machado

*How agricultural matrix intensification may affect forest understory birds? A qualitative model on stochasticity and immigration* ........................................................................................................ 42

Fernando Goulart, Paulo Salles, Carlos Saito and Ricardo Machado

*How does agricultural intensification will affect bird’s species inhabiting a savanna-forest mosaic? A qualitative modelling approach* ............................................................................................................. 51

Francisco J Ruiz, Albert Samà, Germán Sánchez, José A. Sanabria and Núria Agell

*An Interval Technical Indicator for Financial Time Series Forecasting* ................................................................. 60

Gal Kaminka and Natalie Fridman

*Using Qualitative Reasoning for Social Simulation of Crowds: A Preliminary Report* ................................. 66

Kamal Kansou and Bert Bredeweg

*Hypothesis assessment with qualitative reasoning: modelling a periodic spring* ............................................. 75
Kamal Kansou, Tim Nuttle, Katie Farnsworth and Bert Bredeweg

Qualitative model of the long-term carbon cycle: the rise of the vascular plant during the Paleozoic period and its dramatic effect on our atmosphere........................................83

Andrew Lovett and Kenneth Forbus

Organizing and Representing Space for Visual Problem-Solving........................................92

Ester Martinez-Martín and M. Teresa Escrig

A General Qualitative Spatio-Temporal Model Based on Intervals.................................100

Matthew Mcclure, Scott Friedman, Andrew Lovett and Kenneth Forbus

Edge-cycles: A qualitative sketch representation to support recognition..........................108

Lledó Museros, Falomir Zoe, Luis Gonzalez-Abril and Francisco Velasco

A Qualitative Shape Description Scheme for Generating New Manufactured Shapes.........116

Llorenc Rosello, David Garcia, Nuria Agell, Mónica Sánchez and Francesc Prats

Using Qualitative Reasoning to Model Users Profiles: An Approach to Movie Recommendations.................................................................125

Adriano Souza, Gustavo Leite and Paulo Salles

Using qualitative reasoning to model wind power production in coastal zone..............132

Adriano Souza, Isabella Sá, Alexandre Portella, Pedro Aquino, Pedro Costa E Silva, Luiz Wilhelms and Paulo Salles

Evaluating the use of qualitative reasoning models by secondary school teachers..........140

Qiang Shen, Tossapon Boongoen and Chris Price

A Fuzzy Order-of-Magnitude Approach to Qualitative Link Analysis..............................147

Peter Struss and Alessandro Fraracci

FMEA of a Braking System - A Kingdom for a Qualitative Valve Model! ......................159

Peter Struss, Alessandro Fraracci and Daniel Nyga

An Automated Model Abstraction Operator Implemented in the Multiple Modeling Environment MOM.................................................................167

Miha Troha and Ivan Bratko

Qualitative learning of object pushing by a robot.........................................................175

Author Index
